# Product Instructions

Quick Start Guide - BerryKing Lifepulse

## How to wear?

- ① The band and the display is to be worn outward.
- ② Wear the band above the capal where it is the most comfortable and don't adjust the band too tight or too loose.

## On / Off

On: When pressing the button on the screen long or when charging the band, the band will power-on and the screen will lit up.

Off: When pressing the button on the ID page for 5 seconds, the band is turning off and will vibrate once it is off.

Home Page

ID Page

The charging symbol will appear, when the band has no electricity. The home screen will be seen once the batterie is charged enough.

## Install APP

Scan the following two-dimensional code (QR-code):

www.bestbeans.de/berryking-lifepulse-app

Compatible with: Android 4.4 and higher  
iOS 8.0 and higher  
Bluetooth 4.0 and higher

## Connection to Smartphone

First connection:

- a. Ectivate your Bluetooth on your smartphone
- b. Check the device's name on the ID page to find the band more easily
- c. Open the App → enter the settings page → click on „Bind Device“ to automatically search for the band → click on the name which has been found → succeed.

Searching device

Bind the device

Bind successfully

Connection: after the first pairing, the app will save the Bluetooth address automatically. Once the app is open or running in the background, it will search and connect the band automatically.

## How to use?

Time calibration  
The time on the band will be synchronized with the time on the smartphone once and everytime there's a bluetooth connection

Data Storage  
The built-in flash memory can store the scvity data uo to 7 days.

Data Synchronization  
While connected via Bluetooth: slide down on the function pages to synchronize the data and the App will get the data automatically. If the data is big, it might take a while. Please be patient and wait.

Firmware upgrading  
While connected via network: when the App is running it will detect the firmware version automatically and remind you when there's a new version. It takes about 2 minutes to update the firmware. Make sure the band is connected to Bluetooth during the upgrade.
